### Related Experience

**Integration & Launching Specialist.** GrowthZone, Nisswa. June 2017 – Present

Integrate GrowthZone/ChamberMaster module pages seemingly into the client's website. Along with making client websites responsive. I also launch websites with extensive work in DNS hosts. Assist with Web Support when needed giving our clients the best support possible.

**Web Support Specialist.** GrowthZone, Nisswa. July 2016 – June 2017

Provide quality, efficient, and personalized web support daily. The primary function is assisting customers with web support/troubleshooting, CMS instruction, DNS management, and most importantly creating and maintaining the excellent relationships that are the foundation of our success.

### Web Projects

**GrowthZone CMS.** Assisted in creating a new CMS for our clients. Very similar to WordPress but specific to our GrowthZone clients. Used Beaver Builder.

**SSL.** Suggest and instruct clients to secure their websites. Presenting information to better secure and boost their SEO. Have worked with Cloudflare, Let's Encrypt, GoDaddy, Network Solutions.

**LiveEdit 3.6 to Aurora.** Converting non-responsive websites to responsive websites for our clients. This involved transitioning information and Bootstrap HTML coding.

### Web Experience

HTML, CSS, and JavaScript daily to resolve any issues or requests for our clients. Daily DNS troubleshooting including changing IPs, SPF, and email management. I have created or involved in many websites both personally and on the job.

**Excellent References available upon Request.**
